

BIO-RAD

Bio-Rad Laboratories presents

QX200™ Droplet Digital™ PCR system and advanced applications

The third generation of PCR technology providing a revolutionary approach to target DNA quantification.

How ddPCR is changing expectations in molecular biology, with brief examples of:

- ✓ Increasing sensitivity in somatic mutation analysis – the perfect solution to liquid biopsy
- ✓ Accurate quantitation for genetics – CNV data validation, phasing and advanced screening method for genome edited clone selection
- ✓ Sensitivity and accuracy – new paradigm for viral quantitation
